ABSTRACT OF THE DISCLOSURE

A communication method includes the steps of: a)
transmitting an ACK signal indicating a received packet
includes no error or a NACK signal indicating the received
packet includes error from a reception end to a
transmission end, and performing automatic repeat request;
b) obtaining reliability of the received packet when
demodulating it at the reception end; and c) reporting
from the reception end to the transmission end the
reliability of the received packet utilizing the ACK/NACK
signal by using not less than three levels.
